How many solar panel installers are there in the UK?

There are over 4,000 registered solar panel installers in the UK - credit Solar Fast With over 4,000 registered installers in the UK in 2024, finding the right installer for your project can be hard work, especially on top of the cost of solar panels in the UK in 2024. So we're here to help.

How are solar panels installed?

Tiles are lifted so that the installers have access to rafters in the roof. Roof hooks are then inserted onto the rafters before the tiles are placed back, leaving the hooks protruding from the roof tiles. Solar panels are installed onto the mounts. Rails are then secured across the roof hooks so that the panels can lay onto them and be fitted.

Where can I install solar panels?

You can install them on your home, business premises, outbuilding, garden office, shed, workshop or garage- and even shepherd's huts for those who run a luxury holiday let facility. As long as the roof is strong enough and large enough to fit the units, you can install solar panels on whatever type of property you want to supply energy to.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

How much do 4KW solar panels cost in the UK?

GreenMatch's research has found the average prices of domestic 4kW solar panel systems in the UK range between £5,000 - £6,000 (including installation costs), depending on the type of panels you install, their wattage and the manufacturer. Additionally, you can consider solar battery storage.
