Ukraine and its partners are now scrambling to prevent the worst outcomes. In April, Kyiv ordered the country's top energy firms to protect their energy generation facilities, Kharchenko said. Those include sandbags and gabions -- metal cages filled with stones -- at the lower end of protection, and thick concrete covers at the higher end.

Ukraine's energy landscape has been profoundly impacted by the ongoing conflict, with extensive damage to infrastructure and a historical reliance on Russian imports for traditional energy sources like coal, gas and ...

Ukraine extracts about 20 billion cubic meters of fossil gas each year, and since 2022 this has almost met demand. [14] Ukraine has been estimated to possess natural gas reserves of over 670 billion cubic meters (in 2022), [15] and gas is an important part of energy in Ukraine. In 2021, Ukraine produced 19.8 billion cubic meters (bcm or Gm 3) of natural gas.
